'Changing the Taxane Paradigm: Novel Taxanes in Breast and Lung Cancer'

Military Museum - Istanbul - Turkey Thursday 28 September 2006 - 18.00 – 20.45

This symposium will feature expert reviews of "state of the art" management of commonly encountered hematologic malignancies. Myeloma, non-Hodgkin's lymphoma, chronic myelogenous leukemia, chronic lymphocytic leukemia, and myelodysplastic syndromes will each be discussed with a focus on new developments and optimal current management. An interactive audience response system will be utilized to solicit pattern of practice among attendees and this will be followed by expert commentary and discussion.

AGENDA

18.00 – 18:45	Reception & registration	
18.45 – 18.50	Welcome and Introduction	Martine Piccart, MD
18.50 – 19.15	Improving taxane therapy by using new technologies	Hope Rugo, MD
